HACKTOBERFEST HACKDAY COIMBATORE 2026

INIT CLUB & IDEA CLUB

Hosted by

HACKTOBERFEST 26

Organisers hosting

INIT CLUB

INIT Club is a student-led community focused on promoting open-source culture and building a community of students who learn, collaborate, and contribute to open source.

iDEA CLUB

iDEA-Club is a student-led innovation club focused on turning ideas into real-world projects through collaboration, experimentation, and building.

CHECK IN WITH YOUR AI AGENT

**Check me in to
this Fest.**

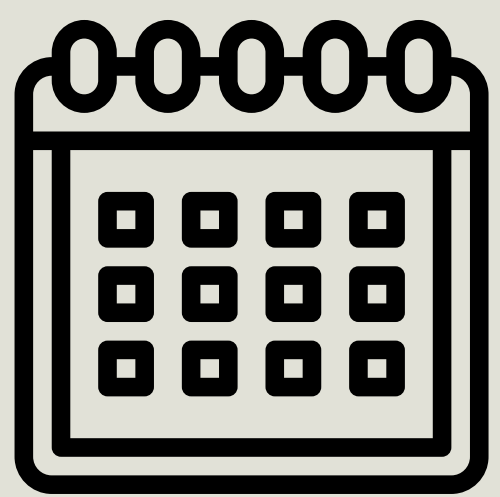

devrelay.com ↗

Install, connect MLH, then ask.

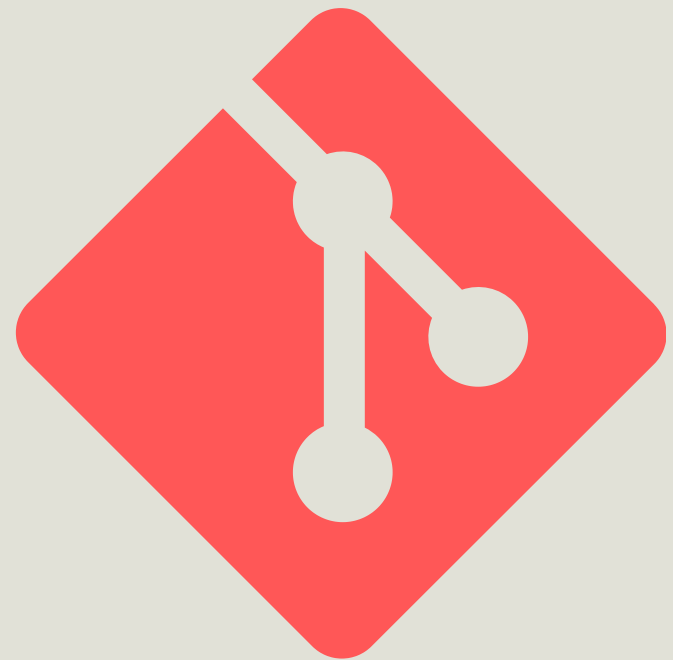

DevRelay is a developer tool and integration suite launched by Major League Hacking (MLH) and DEV (dev.to) that connects your AI coding assistant directly to community knowledge, hackathon challenges, and partner resources.

Hacktober ***Fest***

***A celebration of open source, where
developers collaborate, share ideas, and
build software together.***

OCTOBER

**CONTRIBUTE TO
OPEN SOURCE**

**LEARN
COLLABORATE
AND BUILD**

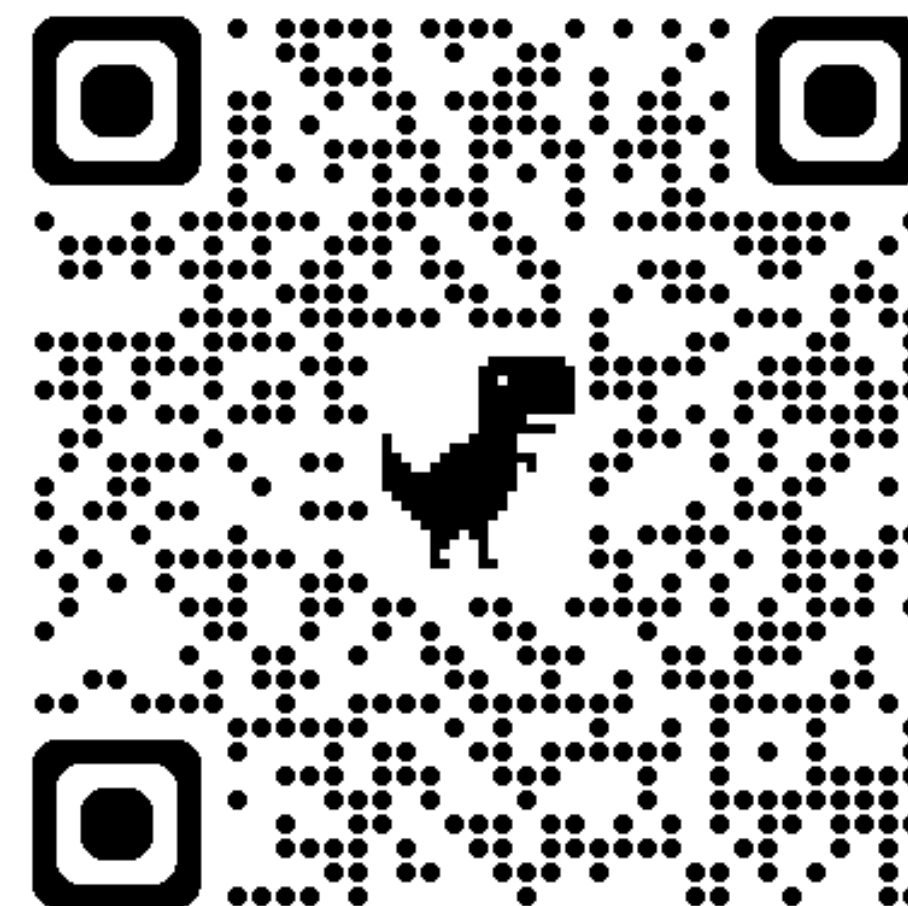

FEST

Best Open-Source AI Project

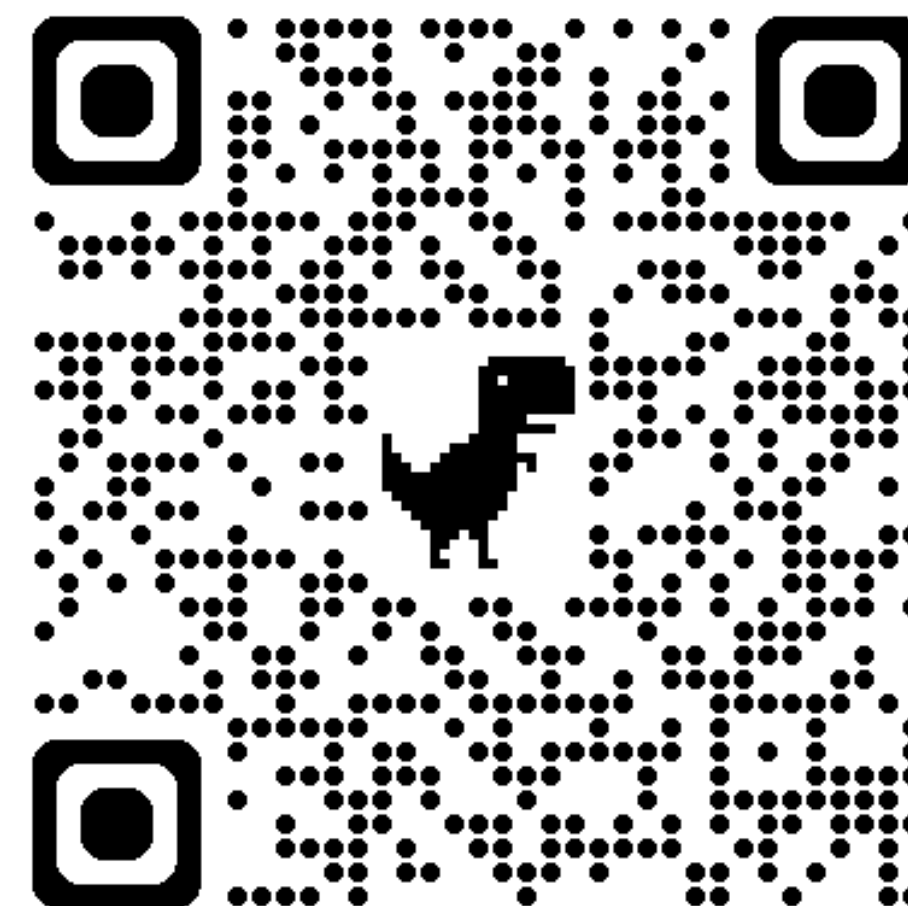

- Build an original project that meaningfully uses open-source or open-weight AI
- This is the main Hack Day track
- The overall 1st-place team is recognized as the Best Open-Source AI Project
- Winning team receives 4 MLH Belt Bags

mlh.com/opensource-ai

Introducing Gemma 4 Challenge

- Gemma 4 is an optional partner challenge
- Enter it in addition to the main Hack Day
- Meaningfully use Gemma 4 in your project
- Prize: SWAG Bags

Hack Day — Open-Source AI

Main Event Track

Open-Source AI Hack Day

- ✓ Build during the Hack Day
- ✓ Use open-source or open-weight AI
- ✓ Public repository & clear license
- ✓ README with setup and usage
- ✓ Document dependencies
- ✓ Submit through MLH / OrganizerHQ

Best Open-Source AI Project

Overall 1st-place team

4 MLH Belt Bags

Optional Additional Challenge

Gemma 4

Best Use of Gemma 4

- ✓ Optional additional challenge
- ✓ Meaningfully use Gemma 4
- ✓ Explain where it's used and what it contributes
- ✓ Demonstrate a working use case
- ✓ Judged separately from the main hackathon
- ✓ Can be won along with the main track
- ✓ Select the Gemma 4 challenge in OrganizerHQ when submitting

PROJECT ELIGIBILITY & TEAM RULES

01

BUILD IT DURING THE HACK DAY

Projects must be started and substantially built during the Hack Day.

Existing tools and dependencies are allowed, but a pre-built project cannot be presented as event work.

02

SHOW YOUR PROGRESS

GitHub commit history may be reviewed to verify work during the event. Make meaningful, incremental commits throughout the day.

All teammates should actively contribute, with at least 1 commit per hour considered during shortlisting.

03

TEAM OF 4

Teams are expected to have 4 members. Each team must designate a Team Lead responsible for submission, documentation and coordination.

04

YOUR WORK. YOUR PROJECT.

Submitted work must be the team's own work.

Libraries, frameworks, models, APIs, datasets and open-source dependencies are allowed. Pre-built projects are not.

05

WORKING BUILD REQUIRED

Teams must be able to demonstrate a working build, prototype or technically meaningful implementation.

The final project should clearly demonstrate actual progress and functionality.

SUBMISSION & CHALLENGE RULES

06

SUBMIT ON TIME

Final projects must be submitted through the official MLH / OrganizerHQ submission flow.

Submission must be completed before the submission window closes.

07

KEEP IT CLEAR

Maintain a clear repository and README.

Include:

- Project
- Setup
- Dependencies
- Usage

Make it easy for judges to understand and run your project.

08

OPEN-SOURCE AI

All teams participate in the main Open-Source AI track.

- Meaningfully use open-source or open-weight AI.
- Public repository where required.
- Clear open-source license where required.

09

PARTNER CHALLENGE

Gemma 4 is an optional partner challenge.

Teams choosing to enter must satisfy the official requirements communicated during the opening briefing / OrganizerHQ.

A project may enter Gemma 4 in addition to the main hackathon where eligible.

10

RULE VIOLATIONS

Suspected plagiarism, pre-built submissions, eligibility issues or rule violations must be escalated to the organizing committee.

Judges should not make independent decisions on disputed eligibility or violations.
